Education & Training

•Lovely Professional University *2023 – 2027*

B.Tech in Computer Science and Engineering ***CGPA: 8.88/10.0 (Through Semester 6)*** Jalandhar, India

•AlgoTutor University (Technical Training) *Jan 2026 – Jun 2026*

Specializations: DevOps Engineering, Advanced System Design (HLD/LLD), Competitive Programming Jalandhar, India

Coding Profiles & Achievements

- Solved **1000+ LeetCode problems**, reaching a **1962 peak rating and Knight Badge** across data structures, algorithms, dynamic programming, and graph problems
- Achieved global ranks of **265, 279, and 389** in LeetCode Weekly Contests, consistently placing in the **top 1%** of 30,000+ participants
- Selected among the **top 20 of 15,000+ students** and ranked **1st at LPU** for the Winter PEP Track after rounds covering algorithmic coding, system architecture defense, and enterprise DevOps testing
- Earned **5-Star Gold Badges** in Problem Solving, Java, and SQL on HackerRank

Technical Skills

•Languages & Core CS: Java, Python, C++, SQL, Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Multithreading, Concurrency

•Frameworks & Architecture: FastAPI, REST APIs, Microservices, System Design, LLD

•Cloud & Data: AWS, Docker, Kubernetes, Linux, Machine Learning, Data Processing, Feature Engineering, Data Pipelines

•Engineering Practices: Full SDLC, Agile, Code Reviews, CI/CD(Jenkins, GitHub Actions), Git, GitHub, Debugging

Projects

•Nexus: High Performance Concurrent Download Engine *August 2026*

Java | Java NIO | Multithreading | HTTP/1.1 | SOLID Architecture **GitHub Repository**

- **Engineered** a production-ready concurrent download engine in **Java**, independently researching and implementing custom HTTP/1.1 range requests to parallelize data ingestion and maximize network throughput
- **Architected** a thread-safe finite state machine and a zero-stitching storage layer using **Java NIO**, enabling autonomous worker threads to write directly to pre-allocated disk segments, eliminating file assembly overhead
- **Ensured minimal defects** by developing a comprehensive multi-threaded integration test suite with byte-for-byte checksum verification, guaranteeing data integrity and robust pause/resume functionality under simulated network failures

•ValuStride: Property Intelligence Platform *May 2026*

Machine Learning | FastAPI | Redis | Docker | Kubernetes | Microservices | System Design **GitHub Repository**

- **Engineered** an asynchronous FastAPI microservice with Redis caching, reducing API response latency by **90%** and achieving **sub-1.5ms** retrieval times by eliminating redundant backend computations
- **Designed and deployed** a Kubernetes-managed service with **2 replicas**, using rolling updates and automated rollout verification to support reliable deployments and fault isolation
- **Applied** Low-Level Design principles and the **Strategy Design Pattern** to structure backend model workflows; implemented **4 model variants**: KNN, SVM, Random Forest, and Hybrid

•Resume Intelligence Platform: AI-Assisted Resume Processing Platform *May 2026*

Prompt engineering | FastAPI | Python | JSON Schema | Data Pipelines **GitHub Repository**

- **Built** a candidate intelligence system in **16–18 hours during a 24-hour company hackathon**, incorporating company feedback to add features, fix bugs, and reduce processing latency from **∼10ms to ∼1–1.5ms**
- **Designed and implemented** modular data pipelines that extracted, validated, merged, and generated canonical schemas from **500+ resumes**, integrating data from **GitHub.json and recruiters.csv** to generate candidate scores
- **Debugged, integration-tested, and refined** software components, resolving **7 bugs** and validating functionality across **20+ test scenarios**

Certifications

- **AI Agent Studio** – Oracle University
- **AI Foundation Associate** – Oracle University
- **Data Platform Foundation Associate** – Oracle University

Positions of Responsibility

- **Class Representative | Section 423YH** Jan 2026 – Jun 2026
  Represented and coordinated a section of **76 students**, managing communication and class-level responsibilities.
- **Teaching Assistant | CSE357 (Combinatorial Studies) & PEA305 (Analytical Skills)** Jan 2025 – Jun 2026
  Mentored **70+ students** through **4 weekly classes**, 1:1 sessions, assignments, and **code reviews**, providing technical feedback on code quality, debugging, and problem-solving approaches
